PROFESSIONAL SUMMARY

Frontend Developer specializing in React and Next.js, combining analytical thinking with a user-focused approach to build scalable, pixel-accurate web applications. Experienced in translating product requirements and designs into clean interfaces, maintainable architecture, and reliable user experiences.

WORK EXPERIENCE

Fullstack Developer

May 2025

iMart Devices (www.imart-devices.tech)

- Built a high-performance e-commerce and device trade-in platform.
- Integrated Key Services & Data Validation.
- Optimized SEO & Production Readiness.
- Crafted a mobile-first, responsive interface utilizing Tailwind CSS, Framer Motion, and GSAP to deliver smooth page transitions.

Fullstack Developer

May 2026

PropertyJarrealty Ltd (www.propertyjarrealty.com)

- Built a responsive real estate marketplace from scratch using Next.js, TypeScript, and Tailwind CSS, serving 5+ clients and 10+ property listings.
- Implemented technical SEO (metadata, sitemap, structured data, image optimization) increasing organic visibility.
- Developed role-based Admin Dashboard for property management, user verification, and analytics, reducing manual listing time by 40%
- Developed reusable React components and shared UI patterns to improve consistency and simplify feature expansion.

Frontend Lead

Jan 2026

FaithCare | React Js

- Led frontend development for a church growth platform, building both user-facing and administrative workflows with React.
- Integrated REST APIs into React and Next applications using Axios/fetch, handling loading, success, error, and empty states across data-driven interfaces.
- Built authentication and role-based access for church administrators.
- Collaborated with designers and backend developers to translate Figma designs and API requirements into production-ready interfaces.
